

Pavo GrainFreeMash

High fibre mash for sensitive horses

Pavo GrainFreeMash is a grain- and molasses-free mash with a very low sugar and starch level, that is considerably lower compared to traditional mashes. Therefore it is the ideal treat for your horse, without providing much extra sugar, starch and energy.

Who doesn't love to watch their horse getting his nose dirty while eating mash?! Though, many traditional mashes are high in sugar, starch and energy and therefore not suitable for all horses and ponies, especially those that are sensitive to sugar, suffering from metabolic problems, or horses that become overweight easily. Because Pavo GrainFreeMash is free from grains and molasses and has a very low sugar and starch content, it enables every pony and horse to enjoy a meal of mash.

Support from the digestive system to the airways

Pavo GrainFreeMash contains high levels of (raw) fibres. These fibres are digested in the hindgut which prevents an increase of glucose in the blood, but also promotes a healthy digestive systems. Additionally Pavo GrainFreeMash is enriched with prebiotics to support the digestive system even more. Additionally, Pavo GrainFreeMash does not only support the digestive system, it can also give relief to the upper airways due to the rich peppermint oil. The mash contains all necessary vitamins and trace element to fulfil the daily requirements. Therefore it is not necessary to add a balancer.

Treat with reduced calories

If you have a horse that is (prone to) overweight you have to be careful with the amount of energy (calories) you feed to you horse. Treats are often a source of (extra) energy and calories and therefore should be avoided. Though, Pavo GrainFreeMash is very low in energy and energy, hence (additional) weight gain will be avoided. Additionally, your horse will not become fresh or hot by eating GrainFreeMash, as it contains so little energy.

A treat for 365 days

Pavo GrainFreeMash is easy to prepare as it is quick soaking (<5 minutes). For the maximal olfactory delight, it's best to prepare with hand warm water. Though, Pavo GrainFreeMash can also be prepared with cold water. As a result Pavo GrainFreeMash functions as a good source of fluids that stimulates water intake and is a perfect mash to mix electrolytes in during summer.

Important characteristics

- Free of grains, molasses and other sugar additives
