

Pavo BasicPlus

The basic pelleted feed for every horse and pony

Pavo BasicPlus is a quality 5mm pellet with an excellent value for money. Pavo BasicPlus is oat-free and packed with essential vitamins and minerals such as vitamin A & E, biotin, and zinc. Low starch and protein levels make Pavo BasicPlus suitable for horses and ponies in light work, that are not in breeding. The fully balanced ingredients mean that horses and ponies with low energy needs will not become overweight or excitable, but still receive the correct amount of key nutrients.

Available in 20kg bags and BigBox.

Pavo BasicPlus is also available in Big Box: the ideal bulk package when you feed 5 to 10 horses the same type of concentrated feed. The Pavo Big Box is more advantageous than bagged feed.

Important characteristics

- Excellent value for money
- With vitamins and minerals to supply key daily nutrients

Application

Suitable for horses and ponies in light work or young horses and ponies that have not yet begun with intensive training.

Feeding advice

- Average advice for maintenance: 330 gram per 100kg bodyweight per day.
- Maximum advice in light work: 420 gram per 100kg bodyweight per day.
- The required amount depends on grazing and work.
