

# Pavo Podo®Start

Small pellets for young foals

**Pavo Podo®Start** (5mm pellet) is not only rich in high-quality proteins (essential amino acids) but also provides all the vitamins and minerals that your young foal needs. It forms a good basis for the transition from mare's milk to solid food. Extra magnesium supports the rapid bone growth during the growth spurt and easily digestible copper, zinc and manganese ensure uninterrupted bone growth. For steady growth of the young foal from 3 weeks to 8 months.

Also watch **step 1**: Pavo Podo®Lac and **step 3**: Pavo Podo®Grow of our Podo®Concept.  
Pavo Podo®Care, a nutritional supplement for very young foals up to 30 months.
