

# Pavo Vital

For the optimal health  
of your horse

Pavo Vital is an innovative balancer for horses and ponies that get little or no concentrated feed in addition to their roughage. It has a tasty, healthy and natural basis of timothy and lucerne.

- ✓ Free of molasses and grains
- ✓ Very low in sugar and starch
- ✓ 100% natural ingredients: timothy and lucerne
- ✓ Well absorbable trace elements
- ✓ Does not contain any synthetic or unnecessary fibres

Do you only give Pavo Vital and do you want to give your horse some extra? Then mix it with Pavo Daily Plus or Pavo SpeediBeet.

# IS YOUR HORSE

*getting enough  
vitamins & minerals?*

## PRODUCT SPECIFICATIONS

### COMPOSITION

Timothy grass (60%), Lucerne (30%), Citrus pulp, Calcium carbonate, Sodium chloride, Vitamins Minerals, Trace elements

### NUTRIENTS (PER KG)

Energy (EWpa)	0,54 Units/kg
Energy (DE)	7,8 MJ/kg
Energy (ME)	6,5 MJ/kg
Dig. crude protein	6,5 %
Crude protein	9,4 %
Crude fat	2,7 %
Crude fibre	28,4 %
Crude ash	16,4 %
Sugar	4,5 %
Starch	0,2 %
Calcium	1,44 %
Phosphor	0,26 %
Sodium	1,55 %
Potassium	2,13 %
Magnesium	0,12 %

### ADDITIVES

#### Vitamins (per kg)

Vitamin A (3a672a)	25,000 IE
Vitamin D3 (E671)	35,000 IE
Vitamin E (3a700)	6,000 mg
Vitamin B1 (3a821)	400 mg
Vitamin B2	400 mg
Vitamin B6 (3a831)	250 mg
Vitamin B12	3,500 µg
Vitamin C (3a300)	5,000 mg
Pantothenic acid (3a841)	400 mg
Choline (3a890)	876 mg

#### Vitamins

Folin (3a316)	225 mg
Nicotinamide (3a315)	1,050 mg
D-Biotin (3a880)	20,000 mcg

#### Trace elements (per kg)

Copper (3b409)	800 mg
Zinc (3b609)	2,500 mg
Manganese (E5)	3,750 mg
Selenium (E8, 3b8.11)	10 mg
Iodine (3b202)	30 mg

### FEED ADVICE

	Amount per day
Horse (600 kg)	100 grams
Pony (300kg)	50 grams

A healthy ration for a horse consists mainly of roughage, supplemented with concentrated feed if needed. Only the amount of vitamins, minerals and trace minerals which a horse gets through its daily ration of roughage is often not enough.

Is your horse getting little or no concentrated feed? Then giving a daily balancer like Pavo Vital is a necessary addition.

**Pavo, the answer to your feeding questions!**

**Pavo**

feeding excellence

# Pavo Vital

## For the optimal health of your horse

Pavo is introducing a new generation of balancers with Pavo Vital: a delicate pellet which contains all the necessary vitamins and minerals that your horse needs, made from 100% natural ingredients and without any unnecessary supplements. And thanks to the special trace elements from Intellibond® it is even tastier!

### When should you give a balancer?

- **If you give no concentrated feed or less than 1.5 kg concentrated feed per day**

If you feed your horse 1.5-2 kg concentrated feed per day, you cover the vitamin and mineral needs of your horse. For a pony of 100 kg this is 0.75 kg/day.

- **If your horse only gets roughage**

You can't tell from just looking at hay and pre-dry how many vitamins and minerals are in them. With Pavo Vital your horse gets a completely balanced dose of vitamins and minerals.

### Why choose for Pavo Vital as a balancer?

- **Pavo Vital contains the latest generation of trace elements: Intellibond**

Copper and zinc naturally have a very bad taste, but by using Intellibond® the taste of those trace minerals is only released in the stomach and not the mouth of the horse. As a result, the taste does not influence the intake and there is no more trouble with the daily intake. Together with the addition of timothy and lucerne, it results in a very tasty feed.

- **Pavo Vital is compiled on the basis of the latest research data and insights regarding feed balancers**

- ✓ free of grains and molasses
- ✓ extremely low in sugar and starch
- ✓ natural ingredients such as timothy and lucerne
- ✓ good edible Intellibond® trace elements
- ✓ extra biotin (supports hoof quality)
- ✓ high amount of vitamin E and selenium (supports skin and muscle health)
- ✓ reduced amount of iron and vitamin A, because this is supplied more than sufficiently in roughage

Tasty!

All vitamins and minerals are scientifically matched. No more hassle with many jars or the risk of overdose. A daily supplementation with Pavo Vital according to the guidelines is enough to support the body processes in your horse optimally.

**Attention! One scoop of feed is not the same as 1 kg!**

### For which horses is Pavo Vital suited?

- **Horses that get little or no concentrated feed**

A deficiency of vitamins and minerals can occur when a horse gets less than 1.5 kg of concentrated feed per day (for a pony less than 0.75 kg/day). A deficiency of vitamins and minerals can't always be seen from the external appearance of the horse. Signs of a deficiency can be: fragile hooves, dull coat, skin problems or muscle stiffness.

- **Horses with a low-sugar ration**

Because Pavo Vital contains as little sugar and starch as possible, it is suitable for horses that need a ration which is low in sugars.

- **Horses that need to lose weight**

If overweight horses have to lose weight, it is often advised not to give any concentrated feed anymore. Make sure to always give sufficient roughage. Add the necessary vitamins and minerals by giving Pavo Vital.
